

Earth Energy Network - Aims, Objectives and Membership

AIM

The Aim of the Earth Energy Network is to help seekers in the field of Earth Healing, Geomancy, Earth Mysteries and Sacred Places within the United Kingdom to establish connections in order to progress on their path.

We are presently witnessing a rapid transformation of the Earth's ecological system, and more and more people are becoming aware that they wish to live in harmony with the Earth, and all beings. As humans, we all have the ability to find a dialogue with the Earth, by exploring special places in settlements and the landscape, celebrating seasonal festivals, finding out about subtle geometries, dowsing Earth energies, making contact with Elemental Beings or engaging in Earth healing. Our higher self holds wisdom, to which we can reconnect to bring our lives in harmony with our purpose and oneness with the cosmos. Human and spiritual, inner and outer teachers will play a role in this process.

OBJECTIVES

- Creating a network of partners to promote the aims and objectives amongst practitioners of earth healing, geomancy, dowsing and Feng Shui.
- Exchanging information, research and experience, thereby building up a shared picture to allow individual initiative.
- Collating regular reports from around the world. Disseminating information through conferences, publications, the media and the Earth Energy Network website.
- Promoting research and identifying conditions for giving assistance at this time of rapid planetary transformation.
- Encouraging joint activities between a range of community based organisations involving children and adults.
- Working with government agencies to influence change in laws and policies.

At this time the state of our environment has become a major concern world wide and various tragic environmental events have highlighted the dilemmas facing us now. Our human evolution has reached a point where we are called to engage with the Earth and each other in a co-creational process, in which our own internal wisdom forms part of a vast jig saw puzzle. The ethical basis for caring for the earth within the Earth Energy Network requires integrity, responsibility, competence and responsiveness. Thus, Earth energy work involves making our work an effective expression of what is true to one's own identity and guidance of the heart. This involves a constant process of self-evaluation and ongoing transformation. The Network is a platform to enhance this process by co-operating with colleagues, finding common ideals, purposes and activities. These are matters of self-evaluation that can be enhanced and developed by working alongside colleagues who are not there to judge or persuade. The Network is a platform for making a difference without having to assume an inappropriate identity or compromising one's beliefs or values.

MEMBERSHIP is open to:

- Practitioners whose seek to deepen their dialogue with the Earth's own consciousness,
- Groups and individuals who are offering courses, camps, talks, conferences and celebrations or other activities centring on the themes outlined above.

WEBSITE

The Earth Energy website is an on-line resource for events devoted to Earth Healing, Geomancy, Earth Mysteries and Sacred Places. This website is intended to serve these groups and individuals, and all who may be drawn towards Earth Energy connections.

CO-ORDINATION AND MANAGEMENT

The network is managed through a co-ordinator who oversees the website and helps to organise events of the Earth Energy network. The present co-ordinators are Lizzie Bryant and Marion Briggs. The work of the network is carried by a core group of active members, selected as required at one of the events of the network.

LIFE-NET

The Earth Energy Network works in co-operation with LIFEnet.

LIFEnet was created in 1997 when representatives of Earth Healing Groups met at the home of the Pogacnik family in Sempas, Slovenia. Their intention was to build a flexible network of groups and individuals world-wide who follow the path of mutual inspiration and cooperation between Humanity and the Earth, as intuited through the work of Marko Pogacnik and his daughters.

The network consists of autonomous groups and individuals who organise themselves, convene and work in their own way. Some have set up associations, publish newsletters, and nourish a common informational platform, others pursue a more individual path.

The basic intent of LIFEnet can be expressed in following way:

The Earth is involved in a wide-reaching transformation process that exceeds our imagination. At this point in time, it urgently needs individuals and groups across the world, who are ready to dedicate their love, attention and creativity to the Earth Soul and her worlds of consciousness and life force. This is a way to protect the wonderful life web pulsating at the Earth surface and to enable its relatively peaceful transmutation.

DISSOLUTION

In the event of dissolution, any assets of the group will become the property of LIFEnet.

FURTHER INFORMATION

If you want to get involved, have any questions, information or suggestions, please contact us at info@earthenergynetwork.co.uk.
